PROFESSIONAL SUMMARY

As a seasoned product designer, I transform ambitious startup visions into beautiful, real-world solutions. I work closely with entrepreneurs, product teams and development teams to build the right software - efficiently, cost-effectively, and with a keen eye for design.

My code development experience, combined with first-hand startup experience, allows me to guide companies from initial concept through successful execution and scaling. Integrating individuals, workflows, and solutions.

17 years in tech, 21 designing, 11 leading teams
